

## Quick Guide

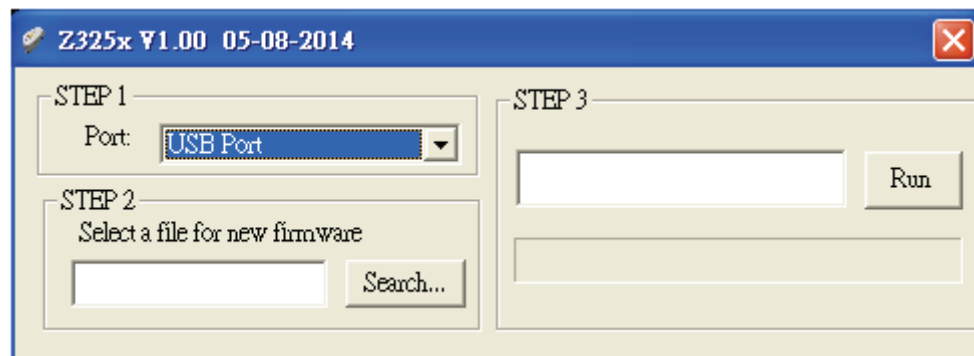

---

### The Steps for updating the firmware of Z-325x scanner

1. Connect USB cable to the barcode scanner and PC.
2. Scan the following labels using your barcode scanner.

3. Run the firmware update tool on your PC. The following screen appears.

4. Select "USB Port" as your port in STEP 1 of the firmware update tool.
5. Select "Search" to find the firmware file, xxxxxxxx.bin.
6. Select "Run" to begin updating the firmware. The scanner will restart when the update is completed.

7. Scan the following barcodes to return scanner to factory defaults.

Start of Configuration

Return scanner to factory defaults

End of Configuration

8. Finally, scan the following barcode to make sure the scanner had been updated to the new version firmware.

SHOW VERSION

## Upgrade Warning

- Incorrect operation may cause dysfunction or damage to the unit.
- Please choose the correct firmware file.
- Do not remove power or reboot the system until the firmware upgrade procedure is complete to avoid possible damage to the unit.
